- Financial statement reporting

Common Questions and Their Answers in Payroll Accounting 2013 Edition

To facilitate a comprehensive understanding, here are frequently asked questions (FAQs) and their detailed answers.

1. How do you calculate gross wages?

Answer:

Gross wages are the total earnings of an employee before any deductions. They are calculated based on the employee's hourly wage multiplied by hours worked, or as a fixed salary. Additional earnings such as overtime, bonuses, and commissions are also included.

Formula:

- For hourly employees:

Gross wages = Hourly wage × Hours worked + Overtime pay (if applicable)

- For salaried employees:

Gross wages = Annual salary ÷ Number of pay periods

Example:

An employee earning \$15/hour working 40 hours a week has:

Gross wages = \$15 × 40 = \$600 per week.

2. What are the typical payroll deductions?

Answer:

Payroll deductions are amounts withheld from an employee's gross wages. They include:

- Federal income tax
- State income tax (if applicable)
- Social Security tax (FICA)
- Medicare tax
- Other deductions such as retirement plan contributions, health insurance premiums, union dues, and wage garnishments.

Important:

Deductions can be mandatory (taxes) or voluntary (insurance, retirement).

3. How is net pay calculated?

Answer:

Net pay, also known as take-home pay, is the amount an employee receives after all deductions are subtracted from gross wages.

Formula:

Net pay = Gross wages - Total deductions

Example:

If gross wages are \$600, and total deductions are \$150, then:

Net pay = \$600 - \$150 = \$450

4. What are employer payroll taxes, and how are they calculated?

Answer:

Employer payroll taxes are taxes an employer is required to pay based on employee wages. These include:

- Social Security tax: 6.2% of wages (up to wage base limit)
- Medicare tax: 1.45% of wages (no wage limit)
- Federal unemployment tax (FUTA): varies, but generally 0.6% on the first \$7,000 wages per employee after credits
- State unemployment tax (SUTA): varies by state

Calculation example:

For an employee earning \$600 weekly wage:

- Social Security = $\$600 \times 6.2\% = \37.20
- Medicare = $\$600 \times 1.45\% = \8.70

5. How are payroll journal entries recorded?

Answer:

Payroll journal entries record the payroll expenses and liabilities. Typical entries include:

- Debit: Salaries and Wages Expense
- Credit: Various liability accounts such as
 - Federal Income Taxes Payable
 - State Income Taxes Payable
 - Social Security Tax Payable
 - Medicare Tax Payable
 - Employee Wages Payable

Sample Journal Entry:

...

Debit: Salaries and Wages Expense \$X

Credit: Federal Income Taxes Payable \$Y
