- Toxic and Infectious Substances (Class 6): Substances harmful or infectious to health.
- Radioactive Materials (Class 7): Substances emitting ionizing radiation.
- Corrosives (Class 8): Substances that destroy living tissue or corrode materials.
- Miscellaneous Dangerous Substances (Class 9): Substances that present hazards not covered in other classes.

- Recognizing Hazardous Materials at an Incident Scene

First responders must quickly identify potential hazards through:

- Labels and Placards: Visual cues on containers and vehicles.
- Shipping Papers: Documentation accompanying shipments.
- Container Shapes and Colors: Recognizing common markings and symbols.
- Environmental Clues: Odors, spills, or unusual conditions.
- Situational Awareness: Understanding the context of the incident.

Incident Response and Safety Protocols

- The "Stop, Think, Act" Approach

This fundamental principle ensures responders maintain safety and control.

- Stop: Avoid rushing into the scene without assessment.
- Think: Gather information, identify hazards, and plan.
- Act: Implement appropriate response measures based on the assessment.
